

Assignment-2

Day 1: - Overview of Peripherals Theory: Functions of printers, scanners, webcams, and connection interfaces.

Task-1:- Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Category	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color photos
Printer	Laser Printer	Printing reports and office documents
Printer	Dot Matrix Printer	Printing invoices and multipart forms
Scanner	Flatbed Scanner	Scanning certificates, photos, and documents
Scanner	Sheet-fed Scanner	Scanning multiple pages quickly in an office
Webcam	Built-in Webcam	Attending online classes and Google Meet meetings
Webcam	External USB Webcam	Video streaming and professional video calls

Task-2: -Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

How a Home Printer Connects to a Laptop or PC

1. USB Connection (Wired)

**Uses:**

- USB cable connects the computer directly to the printer.

Best for:

- Stable and fast connection
- Great for single-device use

2. Wi-Fi Connection (Wireless)

**Uses:**

- Both the computer and printer connect to the same Wi-Fi network (router).

Best for:

- Wireless and flexible
- Multiple devices can share the printer

3. Bluetooth Connection (Wireless)

**Uses:**

- Pair the printer with your computer via Bluetooth.

Best for:

- Short-range, wireless connection
- Useful when Wi-Fi is not available

Note: The exact method depends on your printer model. Most modern home printers support Wi-Fi, and many also offer USB and/or Bluetooth options.

Task-3: - List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Think about speed, convenience, and compatibility.

Connection Interface	Advantage	Disadvantage
USB	Fast and reliable connection; easy to use	Requires a physical cable
Wi-Fi	Wireless and allows multiple devices to connect	Requires Wi-Fi network and setup
Bluetooth	Wireless and convenient for short-distance connections	Shorter range and generally slower than USB

Task-4:- Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Device:

Printer

Connection method: USB cable

1. **Place the printer** near the computer and connect the printer to a power source.
2. **Turn on the printer** using its power button.
3. **Connect the USB cable** to the USB port on the printer.
4. Connect the other end of the **USB cable to the laptop/PC**.
5. Wait for the computer to **detect the printer**.
6. If required, install the **printer driver or printer software** provided by the manufacturer.
7. Open **Settings → Bluetooth & Devices → Printers & scanners** in Windows.
8. Check that the printer appears in the list of available printers.
9. Select the printer and set it as the **default printer**, if required.
10. **Print a test page** to confirm that the printer is connected and working correctly.
